NOTICE TO THE CONTRACTING ORGANISATION AND THE AUTHOR OF THE FUTURE WORK

**Part five
PUBLICATION OF FINAL PROJECTS
Article 35**

1. According to §47b of the Czech Republic law, CTU publishes, not for profit, bachelor's diploma projects and master's dissertations (further only 'dissertations'), including the supervisor's and the opponent's evaluations and the record of the proceedings. CTU stores these documents in its centrally managed Digital Library.
2. The original dissertations are afterwards published by the individual faculties. The publication details, including the access, are determined by the dean of the faculty and are given on the web page of each faculty.
3. A submitted dissertation with the evaluations of the supervisor and the opponent(s) must also be published at least five working days before its defence in the CTU location where the defence is to take place or in the Digital Library. Anybody can make notes or copies of the published work at their own expense.
4. The author of a dissertation must submit its electronic version to the CTU electronic information system within the stipulated deadline. The dean may allow an adaptation of the dissertation to an electronic form in cases where it has specific properties (e.g. a project, a model). By submitting the dissertation, the author agrees to its publication according to the law, regardless of the result of the defence.
5. Authors of the evaluations enter them to the CTU information system directly or through persons authorised by their department's head. By submitting the evaluations, the authors agree to their publication.

(Quoted from the Study and Examinations Rules for Students of CTU in Prague, in force since 1. October 2015)
